## WEEK-02

A.DHIYANESH NAME:

Reg No: 240701133

Week: 02-01

Question 1 Correct Marked out of 3.00

Flag question

primarily use the metric system. Write a program that reads a number of feet from the user, followed by a number of inches. Once these values are read, your program should compute and display the equivalent number of centimeters. Hint:

Many people think about their height in feet

and inches, even in some countries that

One foot is 12 inches. One inch is 2.54 centimeters. **Input Format** First line, read the number of feet.

Second line, read the number of inches. **Output Format** 

In one line print the height in centimeters. Note: All of the values should be displayed

using two decimal places. Sample Input 1

56 Sample Output 1

Falling back to raw text area.

167.64

**Answer:** (penalty regime: 0 %) Ace editor not ready. Perhaps reload page?

#include<stdio.h> int main() { int feet , inches;

float centimeters;

scanf("%d",&feet);

inches+=feet\*12;

return 0;

Input

5

6

}

scanf("%d",&inches);

centimeters=inches\*2.54;

printf("%.2f\n",centimeters);

**Expected** 

167.64

Got

167.64

	Passed all tests! ✓		
Question 2			
Correct			
Marked out of 5.00			
P	Flag question		

Create a program that reads two integers, a

compute and display: • The sum of a and b • The difference when b is subtracted from a •

The product of a and b • The quotient when a is

divided by b • The remainder when a is divided

and b, from the user. Your program should

```
Input Format
First line, read the first number.
Second line, read the second number.
```

First line, print the sum of a and b

**Output Format** 

subtracted from a

Input 1 100 6

Sample Output

106 94 600 16 4

int main()

{

}

Question **3** 

Marked out of 7.00

▼ Flag question

Correct

by b

by b Fifth line, print the remainder when a is divided by b Sample

Fourth line, print the quotient when a is divided

Second line, print the difference when b is

Third line, print the product of a and b

**Answer:** (penalty regime: 0 %) Ace editor not ready. Perhaps reload page?

scanf("%d%d",&a,&b);

int reminder=a%b;

printf("%d\n",sum);

printf("%d\n",difference);

printf("%d\n",product);

printf("%d\n",quotient);

printf("%d\n",reminder);

int difference=a-b; int product=a\*b; int quotient=a/b;

int sum=a+b;

Falling back to raw text area.

#include<stdio.h>

int a,b;

**Expected** Input Got 100 106 106 94 94 6 600 600 16 16 4 4 Passed all tests! <

A bakery sells loaves of bread for \$3.49 each.

Day old bread is discounted by 60 percent.

Write a program that begins by reading the

purchased from the user. Then your program

should display the regular price for the bread,

the discount because it is a day old, and the

total price. Each of these amounts should be

displayed on its own line with an appropriate

label. All of the values should be displayed

Note: All of the values should be displayed

Read the number of day old loaves.

using two decimal places.

Third line, print Total: total

using two decimal places.

number of loaves of day old bread being

```
First line, print Regular price: price
Second line, print Discount: discount
```

Sample Input 1

Sample Output 1

Discount: 20.94

Total: 13.96

Regular price: 34.90

#include<stdio.h>

float r,d,t;

r=n\*3.49;

return 0;

}

d=r\*0.6;

scanf("%d",&n);

int main(){

int n;

10

**Output Format** 

**Input Format** 

**Answer:** (penalty regime: 0 %) Ace editor not ready. Perhaps reload page? Falling back to raw text area.

t=r-d;printf("Regular price: %.2f\n",r); printf("Discount: %.2f\n",d); printf("Total: %.2f\n",t);

Input **Expected** Got Regular price: 34.90 10 Regular

Discount: 20.94

Total: 13.96

Question 2
Correct
Marked out of 5.00
Defens the cuttoned of conema visus to the
Before the outbreak of corona virus to the
world, a meeting happened in a room in Wuhan.
A person who attended that meeting had
COVID-19 and no one in the room knew about

it! So everyone started shaking hands with

everyone got infected! Given the fact that any

two persons shake hand exactly once, Can you

tell the total count of handshakes happened in

that meeting? Say no to shakehands. Regularly

Read an integer N, the total number of people

everyone else in the room as a gesture of

respect and after meeting unfortunately

wash your hands. Stay Safe.

Question 3
Correct
Marked out of 7.00
Flag question
 In our school days, all of us have enjoyed the
 Games period. Raghav loves to play cricket and
 is Captain of his team. He always wanted to win
```

all cricket matches. But only one last Games

period is left in school now. After that he will

pass out from school. So, this match is very

important to him. He does not want to lose it.

So he has done a lot of planning to make sure

his teams wins. He is worried about only one

opponent - Jatin, who is very good batsman.

techniques, that could be most beneficial for

dismissing Jatin. He has given points to each of

the 3 techniques. You need to tell him which is

the maximum point value, so that Raghav can

select best technique. 3 numbers are given in

input. Output the maximum of these numbers.

Three space separated integers.

Maximum integer value

SAMPLE INPUT

Input:

**Output:** 

861

8 9

}

Raghav has figured out 3 types of bowling

SAMPLE OUTPUT 8 Explanation Out of given numbers, 8 is maximum. **Answer:** (penalty regime: 0 %) #include<stdio.h> 2 🔻 int main(){ 3 int n1,n2,n3; scanf("%d %d %d",&n1,&n2,&n3) 4 if((n1>n2)&&(n1>n3)) 5 6 ▼ printf("%d",n1); 7
